Subject Index

Anaemia, aplastic, stimulatory serum factors in. I. Serum 'releaser' activity for haemopoietic growth factors, a regulator? (NISSEN *et al*), 491.
Anaemia, aplastic stimulatory serum factors in. II. Prognostic significance for patients treated with high dose immunosuppression (NISSEN *et al*), 499.
Anaemia, classification of, on the basis of ferrokinetic parameters (BAROSI *et al*), 357.
Anaemia following renal transplantation, correction of: serial changes in serum immunoreactive erythropoietin, absolute reticulocyte count and red-cell creatine levels (REJMAN *et al*), 421.
Anaemia, severe acute aplastic, cyclosporin in the treatment of (JACOBS *et al*), 267.
Anaemias, haemolytic, drug induced red blood cell autoantibodies co-developed with drug specific antibodies causing (HABIBI), 139.
Antigens, heterogeneous distribution of, on human platelets demonstrated by fluorescence flow cytometry (DUNSTAN & SIMPSON), 603.

Apheresis, donor, and therapeutic plasma exchange, changes in plasma fibronectin during (NORFOLK *et al*), 641.
Ara-C, low-dose, in treatment of overt acute leukaemia (RUIZ-ARGUELLES), 584.
Ara-C, low dose, treatment of CML blast crisis with (SCHEY), 578.
Ara-C treatment, low dose, in ANLL and RAEB, favourable remission rate by repeating (IZUMI *et al*), 187.

Book reviews
AIDS—A Basic Guide for Clinicians, 193.
Chemistry and Biochemistry of Pterins, 374.
Current Methodology in Experimental Haematology, 192.
BPA, human active, production of, from TCGF independent T cell lines that do not excrete HTLV: proof of direct action of MLA-144 derived BPA using purified BFU-E (LINCH & DONAHUE), 71.

Cobalamins, microbiologically-inactive (cobalamin analogues), in the human fetus, endogenous origin of (MUIR & LANDON), 303.
Complement, effect on the viscoelastic properties of human erythrocyte membrane (SUNG *et al*), 455.
Counterflow centrifugation of red cell populations: a cell age related separation technique (VAN DER VEGT *et al*), 393.

Danazol, the use of in the management of chronic immune thrombocytopenic purpura (MCVERRY *et al*), 145.
Deoxyribonucleosides, differential metabolism of, by leukaemic T cells of immature and mature phenotype (SIDI *et al*), 125.

Elliptocytosis associated with a truncated spectrin chain, a case of (OHANIAN *et al*), 31.
Eosinophilia, cyclical: a manifestation of periodic haemopoiesis? (DAVIES *et al*), 65.
Erythropoiesis during rapid growth, regulation of (SANENGEN & HALVORSEN), 273.
Erythropoietin assay, *in vitro*, based on erythroid colony formation in fetal mouse liver cell culture (SAKATA *et al*), 293.

Factor VII, activated, is related to plasma lipids, further evidence that (SCARABIN *et al*), 186.
Factor VII from human plasma using a monoclonal antibody, the immunodepletion of (CERSKUS *et al*), 467.
Factor VII in plasma from men at risk for cardiovascular disease, a novel form of (DALAKER *et al*), 315.
Factor VIII antibody in a patient with mild haemophilia (BOVILL *et al*), 323.
Factor VIII coagulant antigen, degradation by proteolytic enzymes (RICK *et al*), 477.
Factor IX, characterization of an occult inhibitor to, in a haemophilia B patient (MILLER *et al*), 329.
Ferritin, human, for the serum ferritin assay, proposed international standard of (I.C.S.H), 61.

Glycolytic enzymes, red cell, in haematological disorders, age dependent behaviour of (JANSEN *et al*), 51.
Graft-versus-leukaemia effect following allogeneic bone marrow transplantation (BACIGALUPO *et al*), 749.

Haemoglobin associated with isolated, purified spectrin from senescent human red cells, demonstration of (SNYDER *et al*), 415.
Haemophilia and related disorders, a study of cell mediated and humoral immunity in (MOFFAT *et al*), 157.
Heart ferritin, human, use of a monoclonal antibody against, for evaluating acidic ferritin concentration in human serum (CAZZOLA *et al*), 445.
Heat stroke, blood coagulation and fibrinolysis in (MUSTAFA *et al*), 517.
Hexokinase deficiency, human erythrocyte: a new variant with abnormal kinetic properties (MAGNANI *et al*), 41.
Hypoplasia, chronic marrow, kinetics of unmatched and HLA-matched radioactively-labelled homologous platelets in recipients with (TOMASULO & FITZPATRICK), 751.

Immunocytopenia, idiopathic combined (WIESNETH *et al*), 339.
^{111}Indium distribution, kinetics of, following injection of ^{111}Indium labelled autologous granulocytes in man (SAVERYMUTTU *et al*), 675.
Infection in immunocompromised patients, investigation of (ROGERS), 195.

Leucocyte-common antigen, human: differential expression of framework and restricted antigenic determinants on early haemopoietic progenitors (KATZ *et al*), 695.
Leukaemia, acute biphenotypic (myeloid and null-ALL type) supervening in a myelodysplastic syndrome (ERIDANI *et al*), 525.
Leukaemia, acute, erythrocyte fragmentation in disseminated intravascular coagulation in (RODEGHIERO *et al*), 593.
Leukaemia, acute lymphocytic, and congenital hypothyroidism, a hereditary abnormal c-*fms* proto-oncogene in a patient with (VERBEEK *et al*), 135.
Leukaemia, acute megakaryoblastic, with 3q inversion and elevated thrombopoietin (TSF): an autocrine role for TSF? (PINTO *et al*), 687.
Leukaemia, acute non-lymphoblastic, circulating autologous stem cells collected in very early remission from, produce prompt but incomplete haemopoietic reconstitution after high dose melphalan or supralethal chemoradiotherapy (JUTTNER *et al*), 739.
Leukaemia, acute non-lymphocytic, collection of circulating haemopoietic cells after chemotherapy in (BERNARD *et al*), 577.
Leukaemia, acute nonlymphocytic, daunomycin administered by continuous intravenous infusion is effective in the treatment of (LEWIS *et al*), 261.
Leukaemia, acute, of childhood, the (4;11) translocation in: the importance of additional chromosomal aberrations (SECKER-WALKER *et al*), 101.

Leukaemia, adult and childhood acute, multimarker phenotypic characterization of: an Italian multicentre study (FOÀ *et al*), 251.
Leukaemia, chronic granulocytic, control of acute transformation in, with low-dose cytosine arabinoside (GALLO *et al*), 586.
Leukaemia, chronic granulocytic, in accelerated stage treated with low dose cytosine arabinoside (WAAGE *et al*), 588.
Leukaemia, chronic myelocytic, increased growth and collagen synthesis of bone marrow fibroblasts from patients with (YONEKURA *et al*), 93.
Leukaemia, chronic myelogenous, basophil function in patients with (LETT-BROWN & JUNEJA), 621.
Leukaemia, chronic myelogenous, extramedullary presentation of the blast crisis of (JACKNOW *et al*), 225.
Leukaemia, hairy-cell, autoimmune disease in: clinical syndromes and treatment (WESTBROOK & GOLDE), 349.
Leukaemia, hairy cell, recombinant α-2 interferon for induction and maintenance of remission in (GAST *et al*), 581.
Leukaemia, lineage specific classification of: results of the analysis of sixty cases of childhood leukaemia (HA *et al*), 237.
Leukaemia of childhood, hyperdiploid acute lymphoblastic, phenotypic and karyotypic properties of (SMETS *et al*), 113.
Liver disease, effect on factors V, VIII and protein C (KELLY *et al*), 541.
Lymphadenopathy, angioimmunoblastic, bone marrow biopsy findings in (GHANI & KRAUSE), 203.
Lymphoma, malignant, profound alterations of the multimeric structure of von Willebrand factor in a patient with (TRAN-THANG *et al*), 307.

Membrane characteristics and osmotic fragility of red cells, fractionated with anglehead contrifugation and counterflow centrifugation (VAN DER VEGT *et al*), 405.
Metabolites, phosphorylated, in stored erythrocytes in an open perfusion system, regeneration of: studies using ^{31}P NMR spectroscopy (CHAPMAN *et al*), 385.
Metastatic tumour cells, detection of, in routine bone marrow smears by immuno-alkaline phosphatase labelling with monoclonal antibodies (GHOSH *et al*), 21.
Monoclonal antibodies reacting with myeloid cells (ROBAK & GOLDMAN), 1.
Monocyte functions, various, the relevance of α-naphthyl acetate esterases to (OERTEL *et al*), 717.
Mononuclear phagocyte differentiation, human: a study of the U-937 cell line by ultrastructural cytochemistry and surface antigen analysis (GOURDIN *et al*), 281.
Monosomy 7 and multipotential stem cell transformation (CHAN *et al*), 531.
Myelodysplastic syndromes: a study of 101 cases according to the FAB classification (VALLESPI *et al*), 83.
Myeloid progenitor surface antigen indentified by monoclonal antibody (BRADSTOCK *et al*), 11.
Myeloma, multiple, a real improvement in the management of?: serum beta$_2$-microglobulin (VAN DOBBENBURGH *et al*), 611.
Myeloma, multiple, evaluation of serum deoxythymidine kinase as a marker in (SIMONSSON *et al*), 215.

Neutropenia, chronic, T-lymphocyte marker analysis in (VAN DER VEEN & VON DEM BORNE), 371.
Nucleotide abnormalities, red-cell, following successful renal transplantation, rapid correction of (REJMAN *et al*), 433.

OKT4$^+$ subsets, PMW-stimulated, inhibitory effect on erythro-, granulo- and megakaryocytopoiesis (SAKAMAKI *et al*), 633.
OKT17, monoclonal antibody, recognizes most cases of T-cell malignancy (MATUTES *et al*), 649.

Paraformaldehyde, a study of the effects of treating platelets with, for use in the platelet suspension immunofluorescence test (MAGEE *et al*), 513.
Platelet fragments do not contribute to elevated levels of platelet associated IgG (KELTON *et al*), 707.
Polycythaemia, electrophoretic analysis of red blood cells in (BROWN *et al*), 667.
Polycythaemia, primary proliferative, treatment by venesection and low dose busulphan: retrospective study from one centre (MESSINEZY *et al*), 657.
Protein C and factor VIII lability (VICENTE *et al*), 190.
Prothrombin consumption, abnormal, inherited haemorrhagic disease with (ROCHA *et al*), 177.
Purpura, post-transfusion, further observation on (VON DEM BORNE & VAN DER PLAS-VAN DALEN), 374.
Purpura, post-transfusion, high-dose intravenous immunoglobulin for (BECKER *et al*), 149.
Purpura, post-transfusion, responding to high dose intravenous IgG: further observations on pathogenesis (BERNEY *et al*), 627.

Red cell enzymes age—how? A new perspective (BEUTLER), 377.

Septicaemia, platelet autoantibodies in (KELTON *et al*), 589.
SLE anticoagulant: transient inhibition by high dose immunoglobulin infusions (MCVERRY *et al*), 579.

T-cell lymphocytosis, chronic, associated with pure red cell aplasia, thymoma and hypogammaglobulinaemia (SOLER *et al*), 582.
Thalassaemia, (β^+, mutation, common Mediterranean, linked to the Ava II$\psi\beta$ polymorphism (THEIN *et al*), 747.
Thalassaemia, beta-, trait in the Punjab (north India) (DASH), 185.
Thalassaemia, beta-, trait, iron overload in subjects with: role of idiopathic haemochromatosis gene (FARGION *et al*), 487.
Thrombosis, recurrent, related to congenital hypodysfibrinogenaemia, episodes of increased fibronectin level observed in a patient suffering from (SORIA *et al*), 727.
Transfusion, blood, and renal transplantation (SINGAL *et al*), 595.

Vascular plasminogen activator (v-PA), release of, after venous stasis: electrophoretic-zymographic analysis of free and complexe v-PA (STALDER *et al*), 169.
